

# OKADA GREEN HEART

NEWSLETTER ISSUE NO. 5 | JANUARY 2025

## Our Journey:

Leading five-star integrated resort, **Okada Manila**, is stepping up to meet a challenge head-on by embracing innovative solutions that reduce environmental impact. As part of its commitment to a greener future, Okada Manila is replacing single-use plastic bottles with a more sustainable alternative: high-quality, filtered water bottled directly within the property.

This initiative was made possible through a partnership with **Nordaq**, a Swedish company known for its state-of-the-art water filtration technology. Nordaq's patented system is the preferred choice of top hotels and restaurants worldwide, allowing Okada Manila to provide its guests with sustainable, premium water.

## The Impact

**bottles of water per hour,  
served in reusable glasses**

**single-use plastic bottles annually**

## Why It Matters:

### Enhanced Guest Experience:

High-quality, filtered water ensures safer and more enjoyable dining and drinking.

Refillable glass bottles eliminate single-use plastics and ease the strain on recycling facilities.

### Reduced Plastic Waste:

### Lower Carbon Footprint:

On-site bottling minimizes transportation emissions.

Reinforces Okada Manila's commitment to reducing plastic pollution and promoting sustainability.

### Eco-Conscious Tourism:

## Join the Okada Green Heart Movement:

Make a difference one bottle at a time.  
Here's how you can contribute:

### Carry a Reusable Bottle:

Choose a durable, refillable option and keep it handy to reduce single-use plastic waste.

### Use a Water Filter:

Install a filter at home or work to improve tap water quality, encouraging fewer bottled water purchases.

### Advocate for Change:

Educate others about the environmental impact of single-use plastics and promote sustainable alternatives like reusable bottles.

## Thank You for Caring!

By making reusable resources widely available, we can significantly reduce plastic waste while fostering collaboration and sustainability.
