

Powering the Future: Okada Manila Installs Entertainment City's First EV Charging Station

At Okada Manila, sustainability is more than a promise—it's a principle in motion. As part of our Energy Efficiency pillar under the Okada Green Heart program, we have launched the first-ever electric vehicle (EV) charging station in Entertainment City, reinforcing our leadership in eco-friendly hospitality.

Conveniently located at the Lower Ground Floor Parking near the VIP and valet drop-off area, the charging station enhances the guest experience while promoting green mobility within the resort.

Key Features of the EV Charging Station

- Two Type 2 charging sockets, each delivering 22 kWh of power

- Charges an EV from 50% to 100% in approximately two hours

- Exclusive valet-operated access for a seamless, hassle-free experience

- Complimentary charging for Reward Circle members in the Maharlika, Supreme, and Okada Club tiers

Driving Sustainability Forward

This initiative supports our resort-wide energy conservation goals, integrating smart systems and clean energy solutions to reduce our carbon footprint. By encouraging the use of EVs, Okada Manila contributes to national efforts in greenhouse gas reduction and clean transport adoption.

Why This Matters:

Champions sustainable travel within a premium hospitality setting

Supports the country's transition to clean energy

Reinforces Okada Manila's role as a pioneer in responsible tourism

Join the Okada Green Heart Movement:

Be part of the change. Here's how you can lead by example:

Encourage guests and peers to make use of EV charging services

Support green mobility by advocating for EV adoption

Practice energy mindfulness in your day-to-day choices

Thank You for Caring!

Together, we move toward a cleaner, greener future—one charge at a time.
